Aim to present the transcription of some excerpta from the unpublished work of Giovanni C. Amaduzzi, *Bibliotheca collectorum, et collectionum veterum inscriptionum sive in marmore sive in aere insculptarum*, completed in 1790, as a preliminary step toward its complete edition. In particular, the paragraphs concerning the epigraphic manuscripts surveyed by Amaduzzi and the entire section concerning the appendix of papyrus documents, with which the work ends, are considered.
