

364 Epicurus Philosophica

Margherita Erbi, Uno scritto epicureo da Hermupolis: a proposito di BKT 10.14.

Papyrologica Lupiensia 30-31 (2021-2022) pp. 191-201.

Ten years after the first edition, a new analysis of the text preserved in P. Berol. Inv. 10536 [B.K.T. X, 14 (= MP3 2574.01; LDAB 154370)], which presents more than a few elements of connections with the contents, motifs and lexicon of Epicurus' works, especially with the letters, offers considerable elements to formulate a reasonable assumption about its setting in the literary production of the Epicureans.
