

241 Nil 364 Posidonius Apamensis

Didier Marcotte, *La météorologie de Poséidonios et la crue du Nil*.

Paolo Desideri & Francesco Prontera, Posidonio πολύτροπος. Filosofia e scienza, storia e geografia. Nono seminario di Geographia Antiqua (Perugia 18-19 novembre 2021) = *Geographia antiqua* 31 (2022) pp. 61-72.

Re-examines a papyrus fragment, P. Oxy. LXV, 4458 (= MP3 1436.01; LDAB 5415), which describes the flooding of the Nile and discusses its causes. Proposes to attribute this papyrus to the meteorology of Posidonius, whose content and method are analysed thanks to several hitherto neglected passages of Strabo and Priscianus Lydus.
