Nikos Litinas, Garlic Braids Sent by a Physician in BGU 7.1674.

BASP 60 (2023) pp. 299-305.

In BGU 7.1674, a revision yields an attestation of the word  $\sigma \epsilon \iota \rho \dot{\alpha}$  (for garlic braids). Although it is an addendum lexicis with this specific meaning, it is understandable and fits the context. The sender, who is a physician, has arranged for some items that possibly concern medicine (that is, garlic) and certainly concern astrology (that is, an astrological table) to be sent to the recipient.
