

Martina Savio, Riedizione di P.Aberd. 12 e 127: stelle fra astronomia "ipparchea" e astrologia "sotica".

BASP 60 (2023) pp. 255-298, figg.

P. Aberd. 12 (= MP3 2002; LDAB 4956) is the only papyrological attestation of a peculiar type of catalogue-text (otherwise attested only in two extracts, one included in the *Aratus Latinus*, another in the scriptio inferior of the palimpsest known as the *Codex Climaci Rescriptus*) with 'markedly Hipparchan' technical features and data. It can therefore be regarded as one of the rare testimonies of the "astronomy of Hipparchus" and of his legacy. - P. Aberd. 127 is part of the same papyrus as P. Gen. III, 123 (= MP3 2065.1; LDAB 4684) and joins the witnesses of the peculiar astrological category of "Sothis texts". - The content of the two Aberdeen fragments and the reunification of P. Aberd. 127 (= MP3 2057; LDAB 4957) with the Geneva fragment provide further clues about their likely provenance from a context such as Soknopaiou Nesos or more generally a settlement in the Fayum.
